

How to put advertisements on the user blogs?

In order to use this functionality, you need first to login to the back office as administrator and then go to the Blogs->Advertisements page.

Be aware that in the current version of Blog System, the advertisements can be added in the four main zones:

1. Top
2. Right
3. Bottom
4. Left

In order to modify the advertisements which show up in a zone, you need to select it by clicking on the map appearing on the Blogs->Advertisements page.

 Manage the advertisements appearing on the user blogs

The advertisements can be put in the 4 zones (top, right, bottom, left) as shown on the following schema:

Please click on a zone (1, 2, 3, 4) to manage the advertisements in it.
To put a banner (gif, flash, frame, ad words) you just need to paste its code in the text box which will show up after selecting a zone.

A product of NetArtMEDIA®

Let's consider an example – you would like to add a flash animated banner in zone 1 (the top area of the blogs).

In order to do this, you have to:

1. Go to the Blogs->Advertisements page
2. Select ZONE 1
3. Then in the text area which will show up, paste the html code for your flash banner:

4. Finally you need to click the Save button in order to save the changes
