

RSS feeds – urls overview

1. Latest notes – latest notes posted on the blog site

Fields

Title: the title of the note

Description: the first <=200 characters of the note

Link: link to the full content of the note

URL

notes.rss (or <http://www.domain.com/notes.rss>)

will provide information for the last 10 notes

if you would like to specify the number of notes you would like to see please, use the following:

notes[NUMBER].rss where NUMBER is an integer, the number of notes you would like to see. For example notes25.rss – last 25 notes

If NUMBER is not a valid integer an error message will be displayed

2. Latest comments – latest comments posted on the blog site

Fields

Title: the title of the comment

Description: the first <=200 characters of the comment text

Link: link to the full content to the note and the posted comments on the user's blog

URL

comments.rss (or <http://www.domain.com/comments.rss>)

will provide information for the last 10 comments

if you would like to specify the number of comments you would like to see, please use the following:

comments[NUMBER].rss where NUMBER is an integer, the number of the

comments you would like to see. For example comments40.rss – last 40 comments

3. Blog Categories – the available blog categories (managed by the administrator)

Fields

Title: the name of the category

Description:

Link: link to the category, displaying the list with the available blogs in this category

URL

categories.rss (or <http://www.domain.com/categories.rss>)

will return a list with the available blog categories

4. User Categories – the available blog categories (created by the bloggers)

Fields

Title: the name of the category

Description:

Link: link to the category on the user's blog, containing the list with the notes that that user has added in this category

URL

user_categories.rss (or http://www.domain.com/user_categories.rss)

5. Blogs – last updated blogs on the blog site

Fields

Title: user name

Description: message in the following format – updated on [DATE OF UPDATE]

Link: link to the blog

URL

blogs.rss (or <http://www.domain.com/blogs.rss>)

will provide information for the last 10 updated blogs

if you would like to specify the number of blogs you would like to see please, use the following:

blogs[NUMBER].rss where NUMBER is an integer, the number of the blogs you would like to see. For example blogs15.rss – last 15 blogs
